Survey on Navigating Software Documentation

In this research, we are interested in extracting useful information from various information sources to later be used to improve software documentation or to develop code recommender systems for developers. In our current work, we focus on extracting information from Stack Overflow. You will be asked to evaluate some selected sentences in various Stack Overflow threads. You will now answer some background questions and then, you will be provided with instructions on how to evaluate the sentences. This survey should take around 10-20 min.

Please note that this study has received ethics clearance from the   We do not collect any identifying information. When the results of this survey are published, they will be completely anonymous. By clicking "Take Survey", your free and informed consent is implied. You can also find a copy of the detailed information letter here here. If you have any questions, please email

Please note that there are known problems navigating this survey on Google Chrome. We recommend you use Safari or Firefox to take this survey.

Please note that you can only do this HIT once. If you have already answered this survey before, we will not be able to accept your HIT.
